

## Rules for crediting the course **GENERAL BUILDING ENGINEERING II (19284106H):**

### LECTURE

The lecture ends with a written exam. There will be one retake exam. The condition for obtaining a positive grade is obtaining more than 50% of points. The following grading scale applies:

- 0-50% – grade 2.0 (negative)
- 51-60% – grade 3.0
- 61-70% – grade 3.5
- 71-80% – grade 4.0
- 81-90% – grade 4.5
- 91-100% – grade 5.0

### PROJECT

Necessary conditions to obtain a positive grade in the course:

1. **Execution of the project** consisting of **three drawings** (vertical section and two details) and the **calculation part** (timber truss and masonry wall) according to the individual topics.
2. Passing the **written test**.

The Grade for the Course consists of two grades: 1° - **the project** (drawings and computational part); 2° - **the final test**. The final grade will be calculated as a **weighted arithmetic mean** value from these two grades. The weights for the particular components are:

- Grade for the project (drawings, timber truss and masonry wall) - 75%
- Grade for the test - 25%.

The grade for the project consists of 5 partial grades and is calculated as a **weighted arithmetic mean** value. The weight for all revisions is 40% and for the final project is 60% (10%+10%+10%+10%+60%=100%).

Failure to submit the progress of work on the project within the deadline for revision/correction - Negative grade 2,0.

Weights for the partial grades for the course				
Grade for the Project <b>75%</b>				Grade for the Test <b>25%</b>
Partial grades				
Grade for revision 1	Grade for revision 2	Grade for revision 3	Grade for revision 4	The final grade for Project
10%	10%	10%	10%	60%

Grade score for the test:

- 91 – 100 % – 5,0
- 81 – 90 % – 4,5
- 71 – 80 % – 4,0
- 61 – 70 % – 3,5
- 51 – 60 % – 3,0
- 0 – 50 % – 2,0

## **FINAL COURSE GRADE AND CREDITS**

The student receives a positive grade and credit for the course only if he/she obtains a positive grade in both forms of classes - Lecture and Project. If the student receives a negative grade in one of the forms of classes, the final grade for the course is negative. The student receives a positive grade (and credit) in the course only if all forms of classes are passed with a positive grade. The final grade for the course is calculated on the basis of the arithmetic average of grades from all forms of classes.
